

War on Waste (Cost Reduction)

COURSE OBJECTIVE: In present scenario, with increased global competition, cost pressure is increasing day by day. Innovative ways for improvements are required to maintain & improve the bottom lines. This program is based on the famous saying: “Eyes can’t see those things which mind doesn’t know”. The program will provide a host of inputs to the mind such that the eyes will automatically start looking for improvements from the very first session.

HOW OUR COURSE IS DIFFERENT: Our courses always try to convert theory into practice using simple & practical examples, close to our daily life. This enables the participants to start implementation right away

This program is UNIQUE in itself: No other program would cover so many exciting techniques (including some important principles of TRIZ) of making improvements and cost reductions in just 3 days of workshop, in a practical and simple manner. Our unique and defined way of addressing the varied principles involved, will help the participants to correlate the principles to their work areas and comprehend improvements, even while sitting in the class itself. We are confident that if the learning of this program is sincerely applied, it can have enormous savings for the organization.

We also undertake consultancy projects and offer in-house training programs.

PREREQUISITE REQUIREMENT: None

Course Coverage & Structure: (sequence may change)

- ✓ Registration on the first day
- ✓ Objectives and Benefits of the program
- ✓ Paradigm
- ✓ Dual function of our role
- ✓ Coming out of comfort zone
